SUMMARY

AI Engineer with hands-on experience engineering, deploying and governing AI/ML systems in complex environments. Track record of taking systems from prototype to production and making advanced AI capabilities reliable, compliant, and usable at scale.

EXPERIENCE

Novo Nordisk Sep 2023 - Current

Forward Deployed AI Engineer Sep 2026 - Current *Copenhagen*

- Built an AI skill prototype for CAPEX cost overrun analysis, turning messy project data into a one-pager on overruns and root causes. Cuts a 4-hour analysis to ∼5 minutes.
- Working directly with manufacturing, legal and HR teams to identify workflows suited for AI automation and to turn them into prototypes.

AI Scientist Sep 2025 - Aug 2026 *Copenhagen*

- Developed and rolled out company-wide agentic AI governance guidelines covering 70,000 employees, and engineered practical tooling (Langfuse, MCP, agentic workflows) to enable users to enforce them.
- Led technical evaluation of an AI governance platform to enable enterprise-wide documentation and observability of models across an ecosystem spanning Databricks, Azure ML and Microsoft Foundry.

Data Science Graduate Sep 2023 - Aug 2025 *Copenhagen and Zurich*

- Engineered from prototyping to production an agentic AI application (LlamaIndex, Langfuse) with the goal of automating pharmacometrics report drafting, cutting report writing time by 80%.
- Trained and deployed deep learning models (TensorFlow, SageMaker) for automated visual inspection of manufacturing defects, increasing detection rates by 5% and reducing false reject rates by 1% in pharmaceutical manufacturing. Deployed on-premises under 50 ms latency constraints.

EDUCATION

ETH Zurich – M. Sc. Data Science Sep 2021 - Aug 2023 *Zurich*

- Grade: 5.67/6.00.
- Courses: Advanced Machine Learning, NLP, Reliable and Trustworthy AI, Probabilistic AI, Machine Perception, Optimisation for Data Science, Computational Statistics, Big Data Law & Policy.
- Thesis: *Learning Latent Representations of Western Classical Music Using Variational Autoencoders.* Self-supervised representation learning of sequential music data with VAEs (PyTorch).

Université Laval – B. Sc. Actuarial Science Sep 2017 - May 2020 *Quebec City*

- Grade: 4.29/4.33.

SKILLS

Languages: Python, SQL, R.

Backend & Infrastructure: FastAPI, Docker, Git/GitHub, GitHub Actions, Azure DevOps.

Cloud & Data: Azure, AWS, Databricks, Snowflake, Azure ML, SageMaker.

LLMs & Agentic AI: RAG, LlamaIndex, LangChain, Langfuse, MCP.

ML & Deep Learning: PyTorch, TensorFlow, scikit-learn, GPU training.

AI Governance & Responsible AI: EU AI Act, NIST AI RMF, Bias evaluation, Explainability.

LANGUAGES

French (native), English (C2), Danish (A1).
